Garden Sheds / Summerhouses / Play Dens

All our timber buildings are manufactured to a very high standard using redwood

pine timber, shiplap and tongue and groove. It is smooth planed. Timber uprights are used a maximum of 18" apart, which gives a stronger building. Any size can be built; we can even accommodate irregular shapes such as five sided buildings.

All buildings are fitted with high grade polyester roofing felt, glass windows, Brenton bolt, turn button and door drip. The price for

an apex or pent shed is the same. Buildings are treated with a quality spirit based preservative of which there are four colours to choose from.

Each building is custom made, which gives you a wide range of options, such as door in any position or panel, single or double doors. Opening or fixed windows. The option of toughened glass or Perspex, rimlock with handle can be supplied. An overhang can be added or perhaps a veranda for those summer evenings.

We also provide a local erecting service for your building and can advise on preparation of a suitable site. If you are in an outlying area, please check as the erecting service may be subject to an additional charge.

We do make bigger and awkward size buildings - just ask for a quote!

TERMS & CONDITIONS

1. Standard building requires 10% deposit, with the balance payable by cash, card or bank / building society cheque on delivery.

2. Non-standard custom built buildings require 20% deposit, with the balance payable by cash, card or bank / building society cheque on delivery.

3. We can deliver self-assembly sheds locally for a small charge.

4. If you require the shed to be carried any distance (i.e. to rear of property) then an additional charge will be made, as this service requires two delivery people. We would need to know this prior to delivery.

5. If we are erecting your new shed, we do require a firm level base with approximately 15" working area around the base.

If the base is not suitable for us to erect your new shed on, then the building would have to be paid for in full, less the erecting charge. The base will then have to be prepared in one of the following ways:

1. By the customer, we would then return to the site and erect the building. A subsequent return charge will be made + the erecting charge.

2. We would prepare the base at an additional cost at the time if it were possible.

3. The customer could prepare the base and then erect the building themselves.

All goods remain the property of Bulldog Sheds & Fencing until payment is received in full.

Payment is due upon supply of goods and / or completion of work.

Timber products supplied by Bulldog are not guaranteed against extreme weather conditions as wood is a natural material, it is liable to warp, split, twist, shrink & some knots may fall out.

Products can only be considered for replacement if they have a manufacture fault.
